PROVILAC: 14% OF PACKS, 29% OF VALUE

Based on one address over 27 days. Worth testing before any wider rollout.

6 OCT–1 NOV 2026

What this data can and can’t tell you

Stock logged every 30 minutes at one address: Sector 3, HSR Layout, Bengaluru 560102, for 27 full days.
Each fall in stock counts as sales at listed prices. Rises are restocks. Stock corrections come out:

6,407 ESTIMATED PACKS

4,091 PACKS REMOVED
MORNING 3,455, CLOSING 408, LATE 178, ONE-OFF 50

WHAT THE DATA SHOWS	WHAT IT CAN’T SHOW
Estimated packs, good for comparing products and hours	True sales: write-offs may remain, resets may hide some sales
How brands and pack sizes rank on packs and on value	Prices paid: discounts, coupons and fees aren’t captured
How often listings are in stock, by hour	Citywide demand: one address, one category, one month
Which products sell fastest when available	Store B’s sales while hidden, often from 9 October
Which substitutions are worth testing	Whether shoppers really switched: these are associations
